

IAAR experts at Dulaty University

Since March 2, 2026, specialized accreditation has been held at Dulaty University in 2 stages, within the framework of agreement No. 111-SA dated December 8, 2026. 31 educational programs, united into 9 clusters, participated in the accreditation. The process was carried out by the Independent Agency for Accreditation and Rating (IAAR).

A total of 27 external experts participated in the accreditation: 12 of them offline, 15 in online format.

On the first day, the experts held meetings with the university's management, heads of structural divisions, deans, heads of departments, teachers, students, graduates and employers. A total of 313 people took part in the interview meetings. The agency also conducted a survey of students and teachers, which was attended by 209 people.

In the first and second stages, cluster experts visited the educational and production facilities of the departments, analyzed the educational process and internal regulatory documents. The experts studied the program self-assessment reports in detail and provided valuable recommendations.

At the final meeting, the NAAR experts emphasized the positive dynamics of the university's development, and made a number of important recommendations on:

- the development of educational programs;
- improving participation rates in research and projects;
- strengthening academic mobility and double - degree education programs;
- improving the efficiency of graduate employment; □
- support for young personnel;
- organization of training seminars for managers;
- website improvements and information updates.

The professional approach and valuable recommendations of the NAAR experts will have a huge impact on the further sustainable development of Dulaty University.
